CUSTOMER JOURNEY MAP · WITH IDA 2030

Martha, 72

Retired · rural · mild visual impairment · low digital skills

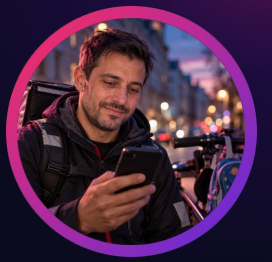

Goal: Understand her letters and get what she is entitled to – without typing and without fear.

	Awareness	Onboarding	First use	Service	Loyalty
Actions	Gets a pension letter she doesn't understand; hears about ida from her daughter	Daughter installs ida; Martha verifies once at a service point	Calls ida: "What does this letter mean?"	Benefit alert: prescription fee exemption; confirms by voice	Uses reminders for her passport; tells her senior club
Touchpoints	Letter, family, municipal office	Service point, guided voice setup	Phone agent, letter scan	Benefit alert, phone agent, face scan	Reminders, human help
Experience	*Sceptical: "Is this safe?"*	*Overwhelmed by the setup*	*Relieved – ida speaks slowly*	*Surprised she is entitled*	*Feels independent again*
Pain points	Distrusts digital government	ID Austria and face scan seem complicated	Fears making a mistake	Face scan is hard with poor eyesight	Worries when something unusual happens
Solutions	**Info via family, pharmacy and service points**	**One visit to a service point, setup by voice**	**ida reads key values back; nothing sent without her yes**	**Voice guidance through the scan, or the service point**	**"Talk to a person" anytime; analog option stays**

CUSTOMER JOURNEY MAP · WITH IDA 2030

Marcus, 34

Delivery driver · father of two · no spare time

Goal: Get every family benefit after his son's birth – in short steps, without paperwork at night.

	Awareness	Onboarding	First use	Service	Loyalty
Actions	Baby Noah is born; doesn't know which applications he needs	Logs in with ID Austria, turns on benefit alerts	ida suggests childcare benefit; form is pre-filled via Project X	Confirms with face match on his break; authority asks for a payslip	Gets renewal reminders; uses ida again when moving
Touchpoints	Hospital leaflet, colleagues, Google	App store, ID Austria	Life event “New baby”, vault, pre-filled form	Face match, live status, push	Reminders, life event “Moving”
Experience	*Stressed, no overview*	*Quick and easy*	*No paperwork at night!*	*Annoyed: one more request*	*“ida thinks ahead”*
Pain points	Many portals, no overview	Unsure which data ida uses	Payment models are confusing	Authority needs one more document	Wants even less effort
Solutions	**Life event shows all steps in one list**	**Clear consent screen and data cockpit**	**Plain-language comparison of the models**	**ida fetches the payslip from the tax office – with consent**	**Revocable standing authorisation for routine applications**

CUSTOMER JOURNEY MAP · WITH IDA 2030

Patrick, 18

Student · grew up with AI · push only, no phone calls

Goal: Have everything automated – and know exactly what the AI does with his data.

	Awareness	Onboarding	First use	Service	Loyalty
Actions	Starts studying in Graz; sees ida at the university welcome days	Logs in with ID Austria, face scan on his new phone, turns on automation	Moves to Graz: ida offers address change and study grant check	Applies for the study grant; one document still has to be uploaded	Gets push reminders for deadlines; recommends ida to friends
Touchpoints	Social media, university welcome days	ID Austria, face match, settings	Life event “Moving”, benefit alert	Push notifications, vault upload, status	Push reminders, sharing
Experience	*Curious, but doubtful*	*Done in two minutes*	*“That's how it should be”*	*Annoyed: not fully automatic*	*Convinced*
Pain points	Thinks government apps are outdated	Wants to know what the AI does with his data	Legal jargon in forms	Some data still needs uploading	No way to give feedback
Solutions	**Modern design, short demo videos**	**Data cockpit; AI label and source on every answer**	**Plain language; German term on tap**	**More registers via Project X by 2029**	**Feedback button and beta tests**
